

**ECNG Energy Group** is Canada's largest and longest standing provider of energy management solutions for a variety of clients across Canada. Specifically, ORHMA has selected ECNG to be the preferred energy manager to act on behalf of their clients across the hospitality industry.

**The ORHMA Energy Program** strives to provide cost certainty while leveraging group buying power. ECNG aggregates ORHMA members' annual natural gas and/or electricity volumes, ensuring members benefit from wholesale market pricing that otherwise would not be attainable.

By participating in the **ORHMA Natural Gas Program**, your price will remain the same for the duration of the term. This allows you to forecast your natural gas expense, avoiding volatile market changes and world events that could severely disrupt your budget.

By enrolling in the **ORHMA Electricity Program**, ECNG looks to secure a certain percentage of your overall volume while the remainder remains on the open market. While this results in price variability month to month, you are able to take advantage of lower monthly market prices but also have a layer of protection in place in those months when the price is high.

The entire onboarding process is simple with ECNG completing the necessary steps with the utilities to add your account(s) to the ORHMA Energy program you selected. Once enrolled in either program, you will continue to receive one invoice from your local utility as usual with ECNG being identified as your commodity provider.

Prior to the conclusion of your term, you will receive a detailed renewal package outlining the new pricing options available for your consideration. By continuing with the program, you will continue to receive the benefits and support available as an ORHMA member enrolled with ECNG.

In the event you come across an energy matter you are not familiar with, ECNG can help. Along with Procurement Services, ORHMA members can take advantage of ECNG's "Wheel of Services":

As a first step in exploring if either of the ORHMA Energy program makes sense for you, ECNG performs a high level analysis of your current natural gas and/or electricity expense.

This is done as a **no-cost, no obligation analysis** ...another benefit ORHMA members can take advantage of.
